CBS CLOUD BACKUP

Worry Free Cloud Data Protection

CBS Cloud Backup is a fully managed backup service that utilises award winning technology from Mozy to protect your business's critical data. This cloud backup service offers automatic backup protection with the option to schedule backups continuously throughout the day. CBS Cloud Backup delivers affordable backup that saves you time and money (and headaches!) so you can focus on other important things, like growing your business.

Studies show that losing critical files for even 24 hours can seriously harm most businesses. And it's about more than just losing money. It's about your reputation... and winning new customers. Are your servers protected? CBS Cloud Backup has you covered. Our service can protect Windows, Mac and Linux servers in addition to all of your computers for complete data protection for your business. You don't have to worry about managing software, schedules or off-site storage of tapes, disks and other media. We'll deploy, monitor and manage every aspect of the backup process so you can rest assured that your data is protected.

What About Security?

Whether you're backing up one server or many servers, it's all for naught if the information isn't properly protected. With CBS Cloud Backup, your data is protected with processes and procedures that meet or exceed industry standards. But what does that mean? It means military-grade security. It means encryption. CBS Cloud Backup uses the highest grade encryption available to ensure that your data is safe and secure on servers, during transit to the cloud, and when stored in the services EU based data centres.
